

## Remote Access for Library Resources

All the library's journals can be accessed remotely.

To do so you must be **logged off the VAI VPN**.

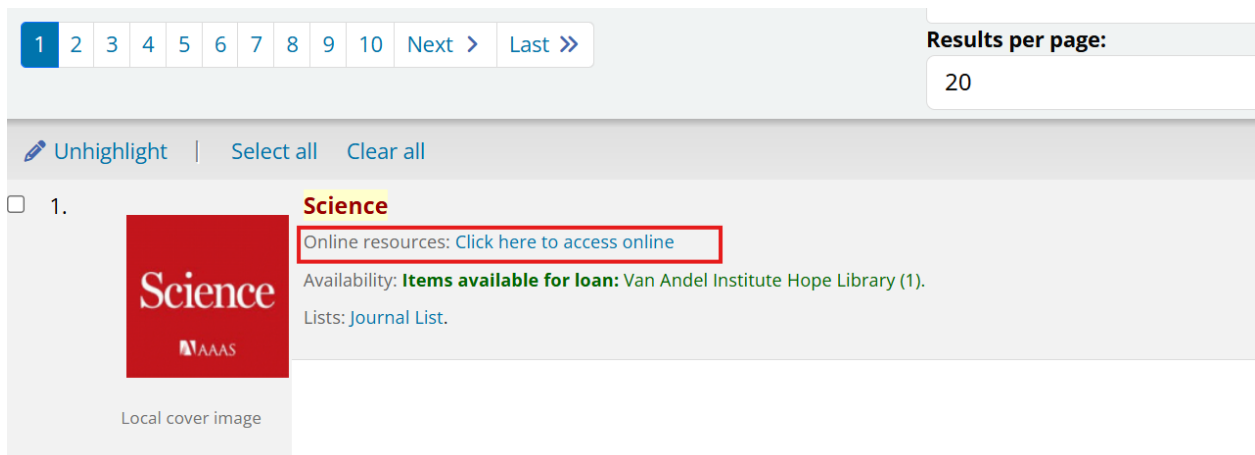

Once you are logged off the VPN you can follow these easy steps to locate full text articles.

1. Begin at the library homepage: <https://vanandel.bywatersolutions.com/cgi-bin/koha/opac-main.pl>
2. Use the search box to locate a journal

The screenshot shows the top of the Van Andel Institute library homepage. It features a black header with the "VAN ANDEL INSTITUTE" logo and a "LISTS" dropdown menu. Below the header is a search bar with a "Keyword" dropdown, a text input field containing "science", an "All libraries" dropdown, and a search button. A blue bar at the bottom of the search area says "Advanced search".

3. From the results click on **Click Here to Access Online**

The screenshot shows the search results page for the keyword "Science". At the top, there are pagination links (1, 2, 3, 4, 5, 6, 7, 8, 9, 10, Next, Last) and a "Results per page:" dropdown set to 20. Below the pagination are links for "Unhighlight", "Select all", and "Clear all". The first result is for the journal "Science", which has a red cover image. To the right of the image, the text "Science" is highlighted in yellow. Below it, a red box highlights the link "Online resources: Click here to access online". Further down, the text "Availability: Items available for loan: Van Andel Institute Hope Library (1)." and "Lists: Journal List." are visible. At the bottom left of the result, it says "Local cover image".

You will be taken to the journal's homepage where you can search for the article(s) you need.
